

# Acknowledgements

We would like to thank all the publishers for the authorization to include the following articles in the present volume:

- “Studies on digitalis in ambulatory cardiac patients. II. The elimination of digitalis in man” by permission of *The American Society for Clinical Investigation*.
- “Studies on antibacterial action of sulfonamide drugs. III. Correlation of drug activity with binding to plasma proteins” by permission of *The Society for Experimental Biology and Medicine*.
- “Fate of procaine in the human body after subarachnoid injection” and “The effect of sodium bicarbonate on the serum salicylate level” by permission of *The American Medical Association*.
- “The pharmacological basis for the rational use of atabrine in the treatment of malaria”; “Theophylline blood levels after oral, rectal and intravenous administration, and correlation with diuretic action”; “Enzymatic oxidation of pentobarbital and thiopental”; “The relation between dose of succinylcholine and duration of apnea in man”; “On the mechanism of intestinal absorption of drugs”; “Kinetics of penetration of drugs and other foreign compounds into cerebrospinal fluid and brain”; “Adaptive increases in drug-metabolizing enzymes induced by phenobarbital and other drugs”; and “Stereoselective metabolism of mephenytoin in man” by permission of *The American Society for Pharmacology and Experimental Therapeutics*.
- “Metabolism of theophylline (1,3-dimethylxanthine) in man” by permission of *The American Society for Biochemistry and Molecular Biology*.

- “Species, strain and sex differences in metabolism of hexobarbitone, amidopyrine, antipyrine and aniline” and “Kinetics of drug metabolism by hepatic microsomes” by permission of *Elsevier Science*.
- “A comparison of the analgesic and respiratory effects of dihydrocodeine and morphine in man” by permission of *Archives International Pharmacodynamics-Heymans Institute of Pharmacology*.
- “Genetic control of isoniazid metabolism in man” by permission of *The British Medical Journal*.
- “Kinetic analysis of blood levels and urinary excretion in the absorptive phase after single doses of drug” and “Methotrexate pharmacokinetics” by permission of *The American Pharmaceutical Association*.
- “Drug interactions in man. I. Lowering effect of phenobarbital on plasma levels of bishydroxycoumarin (Dicumarol) and diphenylhydantoin (Dilantin)”; “Kinetics of pharmacological effects”; “Drug distribution and pharmacologic effects”; “A physiological approach to hepatic drug clearance”; “Enhancement of the bioavailability of propranolol and metoprolol by food”; “Plasma protein binding of basic drugs. II. Importance of  $\alpha_1$ -acid glycoprotein for interindividual variation”; and “Effect of plasma protein and tissue binding on the biologic half-life of drugs” by permission of *Mosby-Year Book, Inc.*
- “Protein binding of diphenylhydantoin and desmethyylimipramine in plasma from patients with poor renal function”; “Drug therapy. Serum drug concentrations as therapeutic guides”; and “Reversal of advanced digoxin intoxication with  $F_{AB}$  fragments of digoxin-specific antibodies” by permission of *The Massachusetts Medical Society*.
- “Polymorphic hydroxylation of debrisoquine in man” by permission of *The Lancet Ltd.*
- “Estimation of population characteristics of pharmacokinetic parameters from routine clinical data” by permission of *Plenum Publishing Corporation*.
- “Understanding the dose-effect relationship: Clinical application of pharmacokinetic-pharmacodynamic models” by permission of *Adis Press*.
